RESTRICTION/ELECTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicants are required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1- 4 and 6-28, drawn to an apparatus for concentrating solutions in a vaporizing receptacle, said receptacle having a mouth for the removal of vapor.

Group II, claims 29 and 32-50, drawn to a method of concentrating a solution.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, because they lack the same or corresponding special technical features as follows:

Claim 1, for example, in the Group II invention is directed to a process/method which is comprised, of a combination of steps such as: dispensing said solution into a vaporising receptacle; maintaining the temperature of said vaporising receptacle and controlling a hot-air heater, whereas, claim I in the Group I invention is directed to an apparatus including a means for sealing the vaporising receptacle to the apparatus, not in the Group II invention. Any common concept such as : the means and method of supporting said vaporising receptacle with the mouth facing upwards; the rotation and pressure means and method that may be deemed to link together the two groups is not novel in view of Lucas et al(3, 871, 574). Lucas discloses a standard bottle used as a vaporising receptacle with a mouth facing upwardly, which is supported by suitable rotary

supporting means; and further discloses a vacuum pump for reducing the pressure within the bottle.

Applicants are advised that in reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Should applicants traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450.
